

JQuery & Javascript

BFF

Introduction

jQuery is made of JavaScript

jQuery is optimized :

- for selection
- animation

DOM Manipulation

Element selection

Javascript	JQuery
<code>document.getElementById("id01")</code>	<code>\$("#id01")</code>
<code>document.getElementsByTagName("p")</code>	<code>\$("p")</code>
<code>document.getElementsByClassName("intro")</code>	<code>\$(".intro")</code>
<code>document.querySelectorAll("p.intro")</code>	<code>\$("p.intro")</code>
<code>document.getElementsByName("chosename")</code>	<code>\$('[name="chosename"]')</code>

Element Content

Javascript	JQuery
<code>myElement.textContent = "Hello Sweden!";</code>	<code>myElement.text("Hello Sweden!");</code>
<code>myElement.textContent</code>	<code>myElement.text();</code>
<code>myElement.innerHTML = "<p>Hello World</p>"</code>	<code>myElement.html("<p>Hello World</p>")</code>
<code>myElement.innerHTML</code>	<code>myElement.html()</code>

Let's have a look

Animations

FadeIn, FadeOut, Show, Hide

```
$(selector).hide(speed,callback);
```

```
$(selector).show(speed,callback);
```

```
$(selector).fadeIn(speed,callback);
```

```
$(selector).fadeOut(speed,callback);
```

Let's animate, mate...

<https://codepen.io/antoine-o/pen/LYPaXWq>

Request over HTTP

Ajax request... but security issues

<https://codepen.io/antoine-o/pen/xxKBQzM>

Thanks!
